

**2006 Drug Formulary  
and Pharmacy Benefit Guidelines**

The Pharmaceutical Horizons Drug Formulary defines the copayment tier status of the medicines most commonly prescribed for Pharmaceutical Horizons members. It may not include all drugs covered by your prescription drug benefit. For benefit coverage or restrictions please check your benefit plan document(s). This listing is revised from time to time as new drugs and new prescribing information becomes available.

The coverage tier for each medication has been indicated. Members pay a Tier 1 copay for most generic drugs and selected OTC medicines. Members pay a Tier 2 copay for higher cost generic drugs and formulary ("preferred") brand name drugs. Members pay a Tier 3 copay for non-formulary and highest cost brand name drugs.

It is recommended that you have this list of medications available when you are with your physician and a prescription drug is going to be part of the treatment for a clinical condition.

**Key to Notations:**

**PA:** Prior authorization may be required for this medication. Please refer to the boxed section at the end of this document.

**ST:** A step therapy protocol is in place for this medication. Claims for this medication will be covered based on the enrollee's previous medication history. If prior medication history does not meet clinical guidelines, prior authorization will be required.

**QL:** Quantity limitations (maximum number of tablets/capsules, etc. per retail prescription) are in place for this medication. Please refer to the boxed section at the end of this document.
